

2nd Grade Common Core: What Should I Be Able to Do?

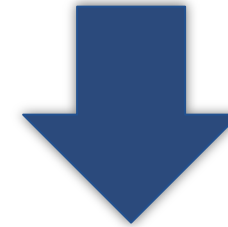

Reading

I can ask and answer who, what, where, when, why, and how questions about my books and explain what the author was trying to teach

Math

I can compare three-digit numbers using $<$, $>$, and $=$ because I understand ones, tens, and hundreds

Listening & Speaking

I can make conversations better by making connections between others' comments and asking questions to learn more

What can you do at home?

- Students should be reading at home every single night! Encourage children to use expressive voices as they read out loud
- Ask your child to tell you specific facts about the nonfiction texts they are reading! "What is the author's main point?"
- Practice comparing numbers while driving in the car or riding the T. Ask, "Which number is bigger? How do you know?"
